

TR:01™ II

THE MOST VERSATILE TYRE IN PIRELLI RANGE, FOR USE IN HIGHWAY AND REGIONAL APPLICATIONS IN ALL WEATHER CONDITIONS PROVIDING HIGHER MILEAGE, LOWER FUEL CONSUMPTION, WHILE PERFORMING AT HIGH LEVEL IN SNOW GRIP AND WET BRAKING, DRY AND WET HANDLING.

TREAD DESIGN

- **Directional tread pattern** and optimised **tread block pitch sequence** offer better traction and acoustic comfort.
- **Deeper grooves** maintain traction and performance for the full tyre life.
- Lateral grooves with **optimised geometry** and depth (Pirelli patent) ensure **even wear** and easy ejection of stones.

TREAD COMPOUND

- Innovative compound, to drive further in safety.
- The new tread compound formula and the high content of silica ensure **high mileage** and **resistance to** the stress typical of tyres intended for mixed use, even on moderately abrasive surfaces.
- Performance in dry, wet and winter conditions is improved whilst maintaining **high safety levels** for the **entire life of the tyre**.
